

TRACTOR TOOLS DIRECT

Mountainpress MP550 TPL

The Caeb mini round baler is a great choice for small tractor owners who still need high production capability. It has standard features not available on other mini balers, including:

- Better stacking bale size of 22" dia. x 20" wide
- Net wrap for tight bales with less material loss
- Lateral drawbar improves visibility and allows baling large windrows with small tractors
- Close tine and roller spacing for less crop loss when baling
- Gathering wheels for baling large windrows
- No hydraulics are required from the tractor

The MOUNTAINPRESS MP550 was originally designed to produce hay in mountain areas with small tractors having a low center of gravity. But we've brought it to the US because it also works great in flat areas with any compact tractor. This round baler is capable of producing up to two bales per minute, giving a production rate of over two tons of hay per hour. The MP550 baler uses a UV resistant plastic net to bind the bale. A horn signals the driver that a bale is being formed. All controls can be operated from the driver's seat on the tractor.

CAEB has been making quality round balers in Italy since 1982.

SPECIFICATIONS:

Bale diameter	22"
Bale width	20.5"
Weight of hay bale	40 - 55 lb
Average bales per hour	80
Pick-up width	28 - 42"
Machine length	7'-5"
Machine width	48"
Height	41"
Weight	650 lb.
Tires	18x8.5-8
Minimum power required	15 hp
Bales per roll of net wrap	350

STANDARD FEATURES:

- Net binding
- Bale counter
- Bale formation horn
- Automatic chain tensioning
- Chain protection clutch
- Height and length adjustable draw bar
- Gathering wheels

OPTIONAL FEATURES:

- Automatic chain lubrication
- Wide-angle PTO shaft
- 3 point connection

Precision Hardened Gears

Closely Spaced Rollers

Pickup With More Tines Per Inch
