

Caroni Tiller

The Caroni FM series of tough compact medium-sized rotary tillers, suitable for tractors ranging from 20 to 50 HP, is ideal for small farms and landscaping companies.

Caroni makes two lines of tillers - one for hobby use, and another, the FM series, for commercial-duty use. We carry the FM series, continuing our philosophy to provide our customers with commercial-duty equipment for their compact tractors.

Model 1100, at a working width of 44", is perfect for subcompacts and older compact diesels. Model 1700, with a working width of 67", easily covers the width of larger utility tractors. With multiple sizes available, there is one to fit any size category one tractor.

Visit our website for more information, videos, and pricing at www.tractortoolsdirect.com.

Caroni tiller features:

- Adjustable skid shoes allow operator to accurately set tilling depth
- Chain drive housed in oil bath provides efficient and durable power transfer
- Adjustable 3 point hitch fits multiple sizes of Category 1 tractors and also allows offsetting the tiller 6 inches to the right.
- Rear cover can be adjusted and held in place with integral chains
- PTO shaft includes adjustable slip clutch to protect tiller and tractor from damage
