Abbriata Compact Square Balers

Tractor Tools Direct is proud to offer the Abbriata line of square balers. These are heavy duty machines that can be operated by your existing 20+ horsepower compact tractor. The Abbriata line is comprised of two models, the Super, and the Mini, having pickup widths of 54" and 42" respectively.

Don't listen to the old-timers or the big farm implement store - you can bale with your compact tractor! And with our square balers, your production rate will rival the big boys while their big tractors gulp twice the fuel. You don't need hydraulics, and you don't need 40+ horsepower. All you need is your 20+ horsepower tractor and the desire to gain independence on your small farm.
