

170 Model
5'-7" Cut

Galfre Drum Mowers

Galfre's mid-sized **drum mowers** are designed for hay producers who want higher production rates and fewer problems in the field. With these machines you get high speed cutting and conditioning all in one machine, and with very few moving parts.

Galfre hay mowers features:

- Fast cutting speeds and absolutely no clogging under any conditions
- Easy manual fold means no tractor hydraulics are needed
- 10 second blade change reduces down time
- Durability far exceeding disc mowers and sickle bars

Features unique to Galfre drum mowers:

- Black Hole conditioning system fluffs and spreads the cut crop for faster drying
- All-shaft drive means no belts to slip, break, or loosen
- Centrally supported drums better follow ground contours and reduce wear on drums

Drum with black hole conditioning system

SPECIFICATIONS:

	130	170
Cutting width (in.)	4'-3"	5'-7"
Number of Cutting Knives	3 per drum	4 per drum
Weight (lbs.)	684	1190
