## Disc Mowers

### MAXIMIZE PRODUCTION ON A SMALLER TRACTOR.

We offer this line of compact disc mowers for farmers with smaller tractors to take advantage of the efficiency the disc mower design provides. The ability to raise and lower the cutterbar from the tractor seat and fast cutting speed can maximize production on a smaller tractor.

### CUTS AT SPEEDS OF OVER 10 MILES PER HOUR.

When you need maximum hay cutting production from your 35 to 50 horsepower compact tractor, Ibex disc mowers are your best option. With these machines you can go from transport to cutting literally in seconds. They are rated to cut at speeds of over 10 miles per hour, which is more than twice the speed most sickle bar mowers will cut.

### MORE ADJUSTABLE THAN OTHER MOWER DESIGNS.

The disc mower design also provides more adjustability in cutting height than other mower designs. For those wishing to leave longer stubble behind after cutting, it may be a better option than a drum mower. Ibex Disc mowers have optional lift shoes that can help provide a taller cut if needed.

### QUALITY CRAFTED IN ITALY.

Ibex disc mowers are quality crafted in Italy, with a proven design in use for over 20 years. When you buy this machine, you can count on a quality mower that will give you many years of trouble-free performance.
