

- Shown with optional wide angle shaft and pickup gauge wheel.

# TM53 COMPACT SQUARE BALER BY ABBRIATA

Don't listen to the old-timers or the big farm implement store - you can bale hay with your compact tractor! And with our square balers, your production rate will rival the big boys while their big tractors gulp twice the fuel. You don't need hydraulics, and you don't need 40+ horsepower. All you need is your 20+ horsepower tractor and the desire to gain independence on your small farm. The **Abbriata square baler** boasts a pickup width of 53", allowing it to handle large windrows.

## FEATURES

- Square balers give you the highest production rate because you never have to stop to tie a bale as you would with a round baler.
- Traditional square balers require a tractor of 40 horsepower or more. Abbriata has changed the design slightly to allow you to bale with a tractor as small as 20 horsepower.
- The plunger compresses the hay with more strokes per minute, meaning less hay is compressed with each stroke, allowing operation with less horsepower.
- Optional pickup gauge wheel.
- Automatic bale counter.

BALE	SPACE BETWEEN TWINES	7 $\frac{1}{8}$ "
	CAPACITY	400 bales/hour
	BALE LENGTH	16" to 51"
	AVERAGE BALE WEIGHT	35 - 55 lbs
	PICKUP WIDTH	53"
	BALE CHAMBER	13 $\frac{1}{2}$ " x 17 $\frac{1}{2}$ "
DIMENSIONS	RAM	90 strokes/minute
	OVERALL WIDTH	77"
	LENGTH	155"
	HEIGHT	53"
	WEIGHT	2205 lbs
RECOMENDED TRACTOR	TRACTOR PTO (minimum)	20 HP
	TRACTOR WEIGHT (minimum)	2300 lbs
