COMPACT PRO HAY PACKAGE

- ♦ Ibex TX31 Mini Round Baler

If you are a farmer who is ready to make the jump to producing your own hay, the Ibex TX31 with NET WRAP is the baler for you! Finally, you can control the quality of your hay by baling when the hay is at peak nutritional value, instead of waiting for when the farmer down the road gets around to it. This is the most affordable net baler on the market and is recommended for customers who want a higher baling capacity of up to 120 bales per hour.

- ♦ Ibex TX80 Belt Rake

Ibex belt rakes offer better raking quality in a simple, durable machine. Their compact, low profile design means you can rake in places that used to be considered too confined for conventional tractor-driven rakes. Since they are designed to work directly behind the tractor and are sized at a nominal width of 5 to 6 ½ feet, if your tractor will fit, so will your rake. An Ibex belt rake is a 2-in-1 machine, easily converting to a tedder with the simple removal of the hay stop.

- ♦ Ibex TS51C Drum Mower with Conditioner

These top of the line drum mowers are designed for maximum production rates with minimum down time, and have several exclusive features not found on other brands. With a built-in flail conditioning system, this mower will spread the cut crop and reduce drying time. Durability and fast cutting speeds will get you in and out of the field in less time and without hassle.
