# SUBCOMPACT HOMESTEADER HAY PACKAGE

- ♦ Ibex TX31 Mini Round Baler
- ♦ Ibex TX51 2 Wheel Rake
- ♦ Ibex TX45 Drum Mower

If you are a small farmer who is ready to make the jump to doing your own hay baling, the Ibex TX31 mini round baler with TWINE is the baler for you! Finally, you can control the quality of your hay by baling when the hay is at peak nutritional value, instead of when the farmer down the road gets around to it. This is the most affordable mechanical baler on the market and is recommended for customers baling up to 90 bales per hour.

The Ibex line of crop-driven wheel rakes is designed to provide a gentle, cost-effective solution for your hay raking needs. Wheel rakes are a simple and economical alternative to powered rakes. There are no requirements for a PTO or hydraulics. The rake is driven by contact with the crop being raked and the forward motion of your tractor.

Made in Italy, this drum mower is simple in design yet durable allowing for ease of use and years of trouble-free service. With a 45" cutting width and fast cutting speeds, this mower easily handles the tough conditions of a hay field.
