UTILITY HOMESTEADER HAY PACKAGE

- TM53 Compact Square Baler by Abbriata
- Ibex TM150 4 Wheel Rake
- Ibex TM67 Drum Mower

Get big time hay production from your compact tractor! Abbriata square balers can produce up to 400 bales per hour, and you only need a 20+ horsepower tractor to operate them. Quality Italian manufacturing ensures reliable service and maximum durability. These balers are crafted for commercial use in the mountains of Northern Italy, but will be just as at home on your farm!

The Ibex line of crop-driven wheel rakes is designed to provide a gentle, cost-effective solution for your hay raking needs. Wheel rakes are a simple and economical alternative to powered rakes on your small tractor. There are no requirements for a PTO or hydraulics on your tractor. The rake is driven by contact with the crop being raked and the forward motion of your tractor.

The Ibex TM67 drum mower is a sturdy, low maintenance machine designed for larger compact tractors. Simple and durable, it is easy to use and will give you years of trouble-free service. With a 67" cutting width and fast cutting speeds, this mower will outperform other mower designs in the tough conditions of a hay field.
