

FLAIL MOWERS

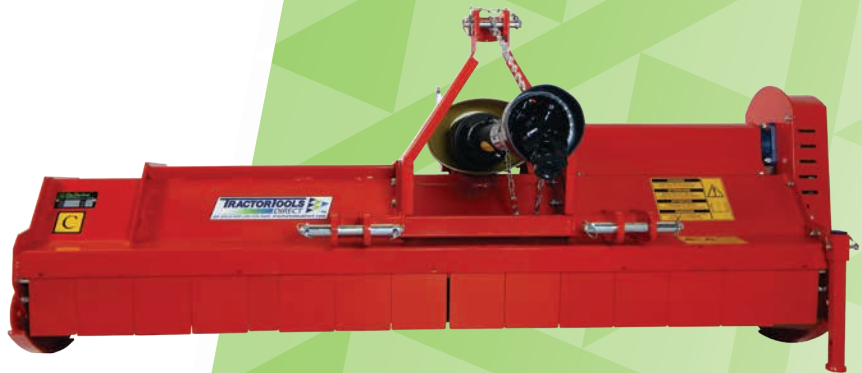

TX52 TX52 FLAIL MOWER

TS62 TS62 FLAIL MOWER

TM73 TM73 FLAIL MOWER

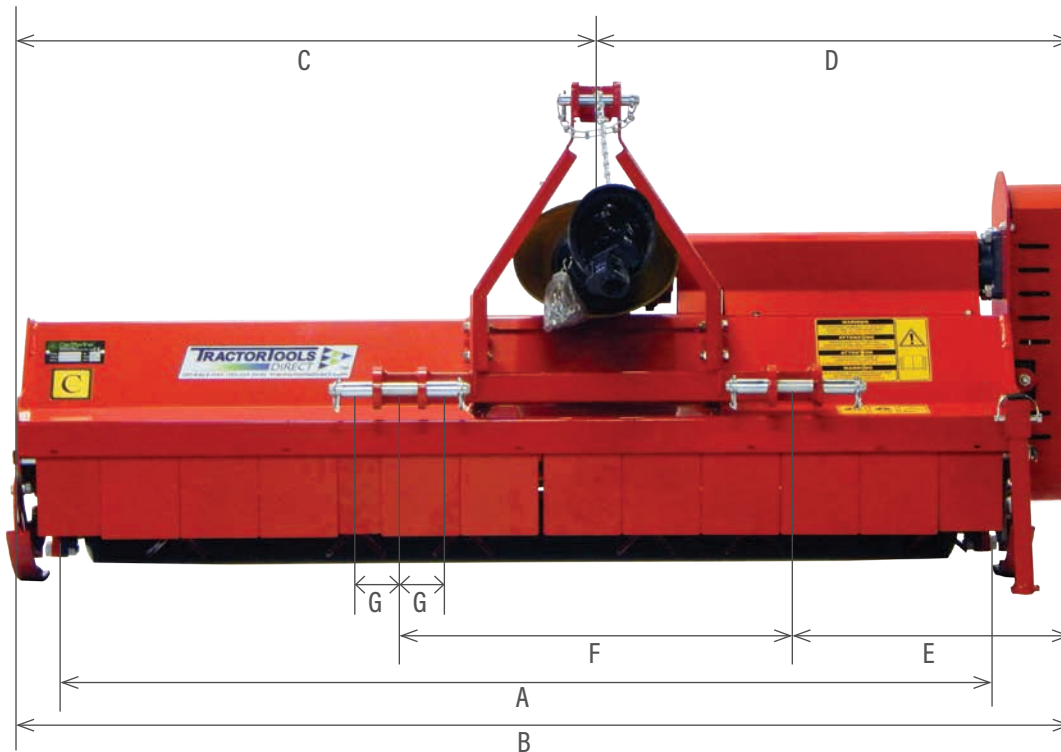

Tractor Tools Direct is proud to offer an exclusive line of commercial grade flail mowers for compact tractors. A flail mower is a superior implement for tough jobs like brush and pasture mowing. Flail mowers evenly distribute clippings, without clumps that kill the grass underneath. We've teamed up with *Del Morino* of Italy to produce a compact flail mower with features not found in the light-duty bargain brands.

Available in 3 models with cutting widths from 52" to 73", these mowers are heavy-duty enough to stand up to tough conditions. While other manufacturers only offer light-duty machines for compact tractors, our mower features heavy-gauge steel, large, thick blades, and 3 belts in the drive system.

FLAIL MOWERS

FEATURES

- Parking stand keeps the mower in the proper position for unmounting and mounting.
- Adjustable anti-scalp shoes protect blades and turf.
- Rear roller sets cutting height and leaves behind an attractive stripe pattern on lawns.
- 3 attachment points on the lower pins of the 3 point hitch allow mounting on multiple sizes of Category 1 tractors and also allow offsetting the flail mower to the left or right.
- Reversible mounting capability allows the mower to operate while driving in reverse, allowing material to be cut before it is run over by the tractor. This can be an especially handy feature when mowing down tough brush like multiflora rose and bush honeysuckle.

A	CUTTING WIDTH	52"	62"	73"
B	OVERALL WIDTH	60"	70"	80"
C	WIDTH, OUTSIDE EDGE TO 3PH CENTER	33"	38"	44"
