TX48 MINI ROUND BALER

- central drawbar
- gathering wheels

- net wrap

- twine wrap

ABBRIATA MINI ROUND BALERS

An **Abbriata mini round baler** is the perfect choice for the hay or pine straw producer who wants a commercial-duty machine that can bale in ways other balers can't. The Abbriata mini round roto-baler was developed for the demands of the mountainous terrain of Europe. Abbriata has been in business for over 100 years and was the first company in Europe to develop both the mini round baler and the square baler. They make a commercial-duty, reliable machine that will give you years of trouble-free service.

Why Choose Abbriata Mini Round Balers?

- Small size and light weight allow them to be run with the smallest tractors, and in tighter spaces and on steep slopes.
- The round bale is much more weather resistant than square bales, meaning a surprise rain shower won't ruin your bales in the field.
- Choice of twine or net binding with no additional charge for net binding option.
- All-chain drive of the rollers and pickup, along with dual shear bolt protection, result in better performance and reduced risk of machine damage.
- Adjustable pickup guide wheel.
- Automatic bale counter.
